ACCESSORIES

The Perfect Products, for Your Home

Ply Gem Performance Collection siding, soffit and accessories protect your home from the elements and keep maintenance to a minimum. Backed by a limited lifetime warranty, our products offer peace of mind and lasting value.

With seven distinct designs ranging from traditional clapboard profiles to the authentic look of cedar shingles, you'll discover beautiful choices in a full spectrum of colors.

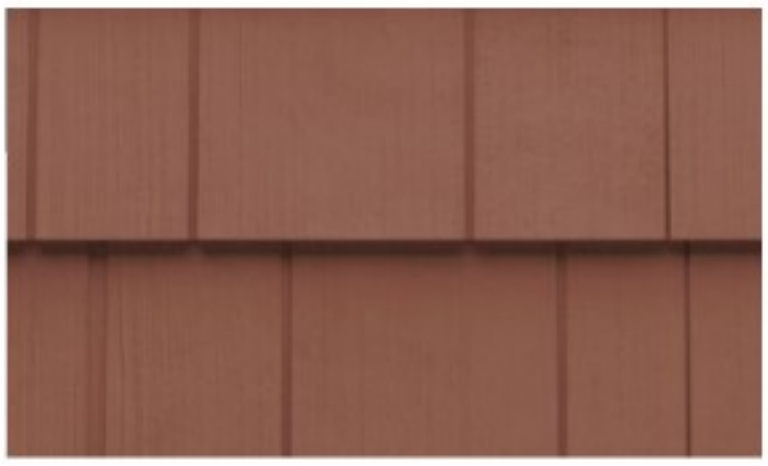

Cedar Dimensions™

Cedar Dimensions™ Shingle and Hand-Split Shake Siding premium cedar panels recreate the natural beauty of hand-tooled, rough-sawn cedar siding without the maintenance.

- Added strength and durability:
  - .090 Triple 5" Shingle nominal thickness
  - .100 Double 7" Shingle nominal thickness
  - .100 Hand-Split Shake nominal thickness
- The Standard Windload Design Pressure (DP) for Double 7" and Triple 5" is 73.3 PSF* with Wind Velocity Resistance of up to 180 MPH**. The DP for Hand-Split Shake is 82.2 PSF* with a Wind Velocity Resistance of up to 185 MPH**
- Advanced, patent pending multi-point locking system ensures secure installation with perfect panel-to-panel alignment
- Random shingle pattern and realistic woodgrain texture replicate authentic wood shingles
- Coordinating corner posts preserve a seamless appearance
- Limited Lifetime Warranty
- Virtually maintenance free

*Example wind velocity for 73.3 PSF is 180 MPH and for 82.2 PSF is 185 MPH Zone B @ 30' building height.
**Tested in accordance with ASTMD5206. Wind speed rating will vary depending on specific code region and construction method. Refer to local building codes for detailed requirements concerning allowable wind load and specified conversion tables for actual wind speed.

CEDAR COLORS

Cedar Colors employ a high-quality coating system using Clear Coat 500® — a multi-layer, weather-resistant, high-end coating with a proven history of unmatched protection against the damaging effects of constant UV ray exposure — along with multiple layers of cedar graining and shading for superior fade resistance, remarkable texturing and color retention.

- 25% less expensive than real cedar
- Won't crack, split or peel like paint
- Available in Double 4" Traditional Lap and Double 4½" Dutch Lap profiles
- Three unique colors to choose from

Progressions®

Enjoy the beauty of wood siding without the work and maintenance, while increasing the value and curb appeal of your home.

- .042" thickness adds impact resistance
- ½" profile height creates realistic shadow lines
- Full-size top lock and return leg ensure a stronger, more secure installation
- Fine-grained design looks like freshly-painted wood
- Available in four profiles: Double 4" Traditional Lap, Double 5" Traditional Lap, and Double 4½" Dutch Lap and Double 5" Dutch Lap
- Limited Lifetime Warranty

Transformations™

No paint. No stain. No hassles. That's the beauty and value of Transformations™ vinyl siding. Every panel has an advanced locking system and nail hem, which makes them an excellent choice for a virtually carefree home exterior.

- .040" thickness adds impact resistance
- ½" profile height creates realistic shadow lines
- Advanced locking system and nail hem ensure a stronger, more secure installation
- Precise, secure mounting, easier installation and tighter fit combine to deliver added strength and stability — even in high winds
- Available in three profiles: Double 4" and Double 5" Traditional Lap and Double 4½" Dutch Lap
- Limited Lifetime Warranty

Aluminum Fascia

The beginning of every siding project, fascia keeps harsh elements from penetrating your home's interior, and causing water and wind damage that can often go undetected for a long time.

- Ribbed Finish results in an installation that is straight and ripple free
- Woodgrain Embossed Finish mimics the look of natural oak woodgrain
- Nominal .024" and .019" thicknesses
- Available in 12 profiles for design flexibility
- Available in colors that match or coordinate with your home exterior color combinations

Accessories

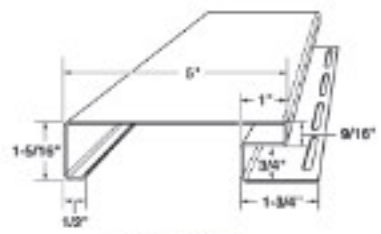

Our vinyl trim and accessories replicate the look of traditional wood trim, but without the maintenance. Engineered to the same exacting standards as our vinyl siding, they're designed to enhance your home's exterior style for years to come.

LINEALS

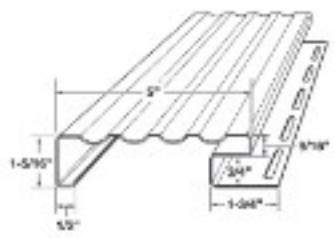

Lineals outline windows and doors. Also called trim or casing, wider Lineals emphasize windows and add a decorative element. A receiving channel to accept siding makes installation easy. We also offer fluted Lineals to complement colonial and other historical styles.

Color & Design

WHAT SIDING PROFILE AND COLOR ARE RIGHT FOR MY HOME?

Choosing the best colors and siding style for your home is fun and easy.

We offer a variety of options to complement your home's architectural design, set a tone, and accentuate or downplay particular features. We can even change the perception of your home's size.

Traditional Lap

These profiles recreate the look of traditional clapboard siding. They're the most popular profiles because they produce a classic look compatible with almost any architectural style.

Dutch Lap

Dutch lap has strong shadow lines and is a popular alternative to standard clapboard profiles. The distinctive beveled panel design dates back to homes built by Dutch settlers on the eastern seaboard.

Board & Batten

Seen from seaside villages to mountain retreats, this rustic style works well as an accent and on the entire home. It's used to accent gables, dormers or to break up large areas of horizontal siding. It's also a popular choice for homes with steeply pitched roofs such as Shed, Folk Victorian and French Country styles.

Shingle, Shake and Half-Round Siding

These profiles are molded from cedar shingles and have a rough texture suited to cape cod or craftsman styles. They're often used as an accent to highlight gables. The half-round is particularly suited to Victorian styles where a gingerbread house effect is desirable.

THINGS TO KNOW TO MAKE COLOR WORK FOR YOU:

Bolder colors give your home a lively, more dramatic appearance.

Softer, subdued tones create a more restful setting.

To make a smaller home appear larger, use light, coordinating colors of similar intensities.

To make a larger home appear less massive, use dark, contrasting colors.

Contrasting colors (opposites on the color wheel) make a home with simple, straight lines more eye-catching.

Small homes look better with fewer colors.

Larger, more ornate homes can handle a main color plus several accents.

Consider your home's orientation to the sun and shade. Colors look brighter under the glare of sun and darker in shade.

Color is personal so choose a palette that makes you happy and reflects your personality.
